## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Burton '855. Burton discloses a sliding quick attachment arrangement (as seen in figures 1-8) comprising a support frame (generally 10) having a lower edge (figure 6, area of reference numeral 35), an elongated catch member 21 attached to the support frame and being substantially parallel to the lower edge, at least one latch structure (50,51,38,26) attached to the support frame, an implement unit (generally 11) having an upper lip (hook structure 16) and a lower lip 15; wherein the upper lip removably and slidably engages the catch member (as seen in figure 4) and there is a slot 17 in the lower lip which receives a locking pin 26 from the latch structure (as seen in figure 6). Also, because slot 17 is a through hole, it extends at least fifty-percent of the length of lower lip 15. Further, Burton discloses the system having at least first and second braces 20 extending between the support frame and catch member.
